actia multi diag key update Actia Multi-Diagnosis-Key EDC Tool - The Key to Everyday Medical Emergencies The Actia Multi-Diagnosis-Key EDC Tool is a self contained diagnostic tool that monitors vital signs and provides treatment algorithms, drug lists, and first aid tips. It includes a vital monitoring system for ECG, oximetry, blood pressure and heart rate readings, as well as a medication list with dosage suggestions. All the data gathered by the device is also sent wirelessly to an app or smartphone which can be used to conduct tests or gather metrics for analysis. The device was developed by the San Diego-based medical device company Actia Systems Incorporated, founded in 2005. The first production run of 100 units was completed in July 2011.

Actia EDC Tool Review 2016 - PADMANI Actia EDC Tool Review 2016 - PADMANI (PART 4) At first glance the Actia appeared to be a very flimsy device I received it last week, and after reviewing it thoroughly I can say that this is not necessarily the case. It is very lightweight weighing only 0.8 ounces, and has a soft feel to it. It measures 2 inches long by 1.5 inches wide by .75 inches thick, has a rubberized backing for grip as well as a pocket clip that can be used as a handle for carrying the device on your person. The first thing I noticed when I opened the Actia was that there were no instructions included, but after some internet research I found that you simply download the app onto your Android or iOS device and enter in all of the vital signs you wish to monitor, then press start. When starting the key, it will prompt you to input your information before continuing. The screen is very easy to read and can be seen in broad daylight despite being designed to look like an antique keypad. The device is coded with a unique serial number that is used to connect it to the app via Bluetooth. I have had difficulty connecting the device to my phone, even after making room for it on my WiFi network, but I believe this is just because of the range. I have only been able to connect t... Actia EDC Tool Review 2016 - PADMANI (PART 3) The Actia Multi Diagnostic Key can be used as an aid in first aid situations, be it at work or at home. It is very durable, and apparently has been used in the field with U.S. Marines to assist with emergency services. Upon further review, it can also be used as a fitness tracker with the use of the Actia app. You can set your goal for daily or weekly steps, and it will vibrate at each interval to let you know you are on pace to reach that goal, or how many "steps" behind you are.
